

Dario Van Mechelen

Webdesigner / UI & UX designer

About me

I'm a thoughtful and detail-oriented person who enjoys bringing structure and clarity to complex ideas. I naturally gravitate toward calm, well-organized work and like taking the time to understand how people experience and move through digital spaces. I'm curious by nature, driven by focus and continuous learning, and I enjoy fully immersing myself in the things I work on. I value simplicity, intention and progress, and I'm motivated by doing work that feels purposeful and well considered.

Experiences

Webdesigner & developer | September 2022 – now

Swift Marketing Agency | Antwerp

As a Web Designer at Swift Marketing Agency, I took ownership of **designing and developing websites from concept to launch**, primarily using WordPress and Elementor. I worked closely with clients to define structure, visual direction and user flow, while collaborating within a multidisciplinary team. I also contributed to branding and social content, and strengthened my skills in SEO and analytics to build performance-driven websites.

Freelance Webdesigner | September 2019 – June 2022

Freelance | Antwerp

I worked as a freelance Web Designer, designing and developing websites using WordPress and Elementor. I handled projects from concept to delivery, translating ideas into clear structures and engaging visuals. Working independently strengthened my problem-solving skills, adaptability and ability to make design decisions with confidence, while delivering websites that were both functional and visually refined.

Intern graphic design & video | March 2019 – May 2019

BUBKA | Antwerp

During my internship at BUBKA, I worked on a variety of visual content projects, including social media videos and graphics, movie trailers, and motion graphics. I contributed to campaigns for well-known brands such as Dr. Oetker and Lutti, gaining hands-on experience in storytelling, animation and visual consistency while working in a fast-paced, creative studio environment.
